

Energy-efficient Nightliners!

DD45LE

Double Decker 45 - **LOW EMISSION**

Safety, Comfort & Efficiency!

High energy efficiency, more storage space and a whole new sense of space.

To make everyday touring more sustainable and climate-friendly, we have completely rethought and redesigned our tour buses. Our fleet consists of modern, energy-efficient vehicles. Together with our modular lightweight interior systems, we reduce the overall weight of the vehicles, achieving fuel savings of more than 10% compared with previous Nightliner generations. The integrated Solar Comfort System (SCS) supports the on-board power supply, increases the share of renewable energy and lowers greenhouse gas emissions. With mobile solar installations totalling 120 kWp across the fleet, up to 55 tonnes of CO₂ can be saved every year.

Thanks to these fuel savings, we cut the CO₂ emissions of our approx. 90 vehicles by around 450 tonnes per year!

Equipment and features

- Modular interior system
- Noise-reducing design
- Front lounge or suite
- Rear lounge or suite
- Suites with king-size beds
- 2-tier bunks*

- WC & shower
- Wardrobe
- Kitchenette with coffee machine, microwave, fridge
- Cooking area – optional

- **Solar Comfort System (SCS)**
- **4 individually configurable climate zones***
- Active filtration system
- Ambient LED lighting system
- Multimedia entertainment systems
- DVB-T TV – while driving

*Our drivers can convert the bunks to one or two beds at any time.

Optimal air quality in the Nightliner

Intelligent air distribution for maximum travel comfort

The modern ventilation system provides a continuous supply of fresh air throughout the vehicle with up to ten air changes per hour. Fresh air and recirculated air are treated by a multi-stage active filtration system and distributed evenly to the passenger and sleeping areas. The result is a consistently pleasant and hygienic indoor climate – even on long tours.

DD45LE Double Decker

Variants

6 - 12 beds

Max. 12 people

- Front lounge
- 6 bunk units
- 6 - 12 beds configurable
- Rear L-shaped lounge

8 - 16 beds

Max. 16 people

- Front lounge
- 8 bunk units
- 8 - 16 beds configurable

4 - 8 beds
+ mega lounge

Max. 8 people

- Front lounge
- 4 bunk units
- 4 - 8 beds configurable
- Mega lounge

Front suite + 8 beds
+ mega lounge

Max. 9 people

- Front suite with king-size bed
- 4 bunk units
- 4 - 8 beds configurable
- Mega lounge

Technical data and dimensions

External dimensions:

Length: 13.9 m / 45'7"
Width: 2.55 m / 8'4"
Overall height: 4.0 m / 13'1"

Interior headroom:

Upper deck: 1.68 m / 5'6"
Lower deck: 1.82 m / 6'

Weight:

Max. weight: 26.5 t

Environment:

Euro: 6
Selective Catalytic Reduction (SCR)
Emission Control System (CRT)
Solar Comfort System (SCS)

Internal power supply:

230 V on-board power system

External power supply:

CEE 32A 400V (5-pin) or
CEE 16A 400V (5-pin)

Luggage compartment:

Load volume: approx. 3 m³
Max. payload: 3.0 t

Optional trailers:

Backline trailer 18 m³ or
bath trailer

Images and photos may differ from the actual vehicle!

18 m³ standard backline trailer for every vehicle in the fleet

18 m³ for every vehicle in the fleet

We designed the backline trailer based on everyday experience in handling and transporting luggage and instruments. Heavy flight cases can be loaded easily via the long ramp. Floodlights around the ramp improve safety when loading and unloading at night. Cargo is secured with continuous load-securing rails for telescopic bars and ratchet straps. The height-adjustable drawbar allows the trailer to be used with a wide range of vehicle types.

External dimensions:

Overall length: 4.7 m / 15'5"
Overall width: 2.5 m / 8'2"
Overall height: 3.25 m / 10'8"

Box external dimensions:

Length: 3.20 m / 10'6"
Width: 2.55 m / 8'4"
Height: 2.55 m / 8'4"

Box internal dimensions:

Length: 3.13 m / 10'3"
Width: 2.40 m / 7'10"
Height: 2.45 m / 8'

Cargo space:

approx. 18 m³
Max. payload: 1.8 t
